EXPERIENCE

Front-end developer | Axon

Aug. 2021 - Present

- Leading front-end team at Axterior product, collaborative recruitment SaaS platform that allows companies and recruitment teams to source, manage, and hire the best talents.
- Supporting and reviewing other developers. Planning and distributing sprint tasks among the front-end team. Establishing the best practices of writing clean and efficient code.
- Working in typical scrum teams, participating in daily meetings, groomings, retrospectives, etc.
- Participating in the interview process to select the best talents for the company.
- Worked on several projects: both external and internal.

Main stack: TypeScript, React, React Query, Material UI, React Hook Form

Front-end developer | ЛУН

Aug. 2018 - May 2019

- Worked on a big multilingual project Flatfy (Korter), which provides information about real estate in 9 countries.
- Transformed a multi-page project (jQuery) into a single-page application with React, MobX, and styled-components.
- Implemented responsive and cross-browser HTML/CSS layouts, new user-facing features, performed bug fixes, and improved codebase quality.
- Developed new reusable React components, managed front-end data state and proper communication with a server.
- Worked in an agile team of designers (Sketch), back-end developers (PHP and Node.js), and content specialists to meet project goals and create effective user experiences.

Main Stack: JavaScript, React, MobX, SCSS, Styled Components
